

# CableBox Mini

OUT OF SIGHT, OUT OF MIND

# UNDER THE DESK / NEXT TO THE COMPUTER / OR NEAR YOUR APPLIANCES / ACCESSORY CABLES ARE ALWAYS TIDY AND DUST FREE

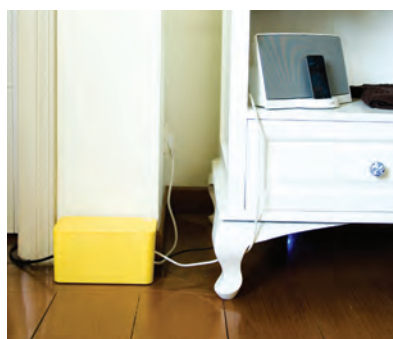

Simply place your AC adapters inside CableBox Mini. No need to unplug anything first. Then stow away the surplus cable lengths and close the lid. **DONE!** With cable outlets either side, CableBox Mini is ideal for hiding the cords, adapters, small hubs and even small power strips.

Cablebox mini is great for small power strips and cable clusters on the floor but it also works just fine on a desktop thanks to it's nice bright colors and compact size. It can be used for routers or hubs around computer equipment or simply as a place for quick clean access to a power source.

**MADE FROM FIRE RETARDANT PLASTIC /**

**DESIGNED FOR AC ADAPTERS AND THEIR CABLES /**  
Small power strip may also be used.
