

Cool Feet

AIRSPACE FOR LAPTOPS

NO DOUBT ABOUT IT LAPTOPS GET HOT, OFTEN VERY HOT. So hot in fact that manufacturers now prefer the term “portable computer” since you cannot use them on your lap without a risk of injury.

We designed the simplest and most efficient solution to this dilemma. Cool Feet: ultra compact and removable supports for the laptop whenever needed. Fixed with suction cups they are simple to attach and detach, raising the laptop just enough to allow a constant cooling airflow.

Not only do Cool Feet raise the laptop for cooling, they also create a comfortable ergonomic angle for the keyboard. In fact, this bonus feature is one many users appreciate the most. After typing on an angled keyboard, it is really hard to go flat again.

THE BEST ANGLE

The Cool Feet package includes two tall feet and two short feet allowing user customization in three different angles and positions.

HOW IT WORKS

Cool Feet attach directly to any laptop with a smooth underneath surface such as an iBook. For non-smooth surfaces, we include four ultra-thin clear adhesive plates to be glued on the underside of laptop to which suction cups will latch tightly, while still remaining easily removable.

To remove, simply pull the small tab then store the feet until required in the provided carrying pouch.

PACKAGE CONTENT

SPECIFICATIONS:

Package Contents:

Two tall Cool Feet, two short Cool Feet, four adhesives plates and one carrying pouch.

UPC Codes

Silver: 689076707442

100 units per master
